INTERNSHIP PROGRAM

PAPER PRESENTATION

DR. MAHALINGAM COLLEGE OF ENGINEERING AND TECHNOLOGY

UDUMALAI ROAD, POLLACHI-642 003, TAMILNADU, INDIA.

Our Mission & Vision

To become a Centre of Excellence in education and research in the field Of Information Technology, to meet global challenges in computing industries.

To impart world-class knowledge in the field of Information Technology.

To promote industry-institute interactions to empower the faculty members and students.

To support and facilitate research and development activities.

To develop all round personality by inculcating the values and skills needed for students to upgrade themselves as IT professionals.

PROGRAMME EDUCATIONAL OBJECTIVES

Have high level of technical competency to identify problems and to generate innovative solutions, which would conform to the need of IT industry.

Graduates
of this
program
will...

Ethically apply
their computing
knowledge and
skills considering
societal,
economic and
environmental
factors.

Successfully adapt to changes in
roles and responsibilities,
through lifelong learning, both
collaborating professionally with
various stakeholders.

PROGRAMME OUTCOMES

1. Apply knowledge of mathematics, science, engineering fundamentals and an engineering specialization in the field of Information Technology.

2. Identify, formulate, analyse and solve complex problems in computing industries using principles of mathematics, natural sciences and engineering sciences.

3. Design a software solution for complex engineering problems and design system processes to meet specific needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusion.

5. Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

6. Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Understanding the impact of engineering solutions in social environment and exhibit the knowledge for sustainable expansion.

8. Realize and bind to professional ethics and the norms of engineering practices.

9. Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.

10. Communicate with engineers and society to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions related to IT Professionals.

11. Demonstrate and apply the knowledge of engineering and management principles to one's own work, as a team leader or a member to manage project in multidisciplinary environments.

12. Recognize the need for, and have the ability to engage in independent and life-long learning in the context of technological change.

Outcomes

Looking to see that the help being given makes a difference.

“Service to others is the rent you pay for your room here on earth.”

Muhammad Ali

THE WALKING HOUSE

The Walking House, a collaboration between MIT and Danish Design collective N55, took a journey through Cambridgeshire in England as a part of art project at the Wypsing Art Centre.

Houses are normally fairly stationary object which is six to ten feet high, powered by solar panels, and is designed kitchen, toilet, bed and wood stove. This house is designed to move at muscle speed of a human, the house that walked at about five kilometres per hour around the 11 acre campus.

The "Leg System require a software algorithm to estimate the position of each articulated element based on the desired position of the foot". This process is known as Inverse Kinematics (IK). The Inverse Kinetics algorithm are well developed for rotary joint systems like servo-based hexapod walkers but the future invention came up with the tetrahedral legs. The six legs provides stability even over unpredictable terrain.

This house is planned to make the house walk well enough that you could program a set of GPS via the on board computer.

J. Krishika

2nd IT-A.

Have anyone seen a 9's fan's clock?

Solutionn

The 1-12 are calculated each with three 9s as:

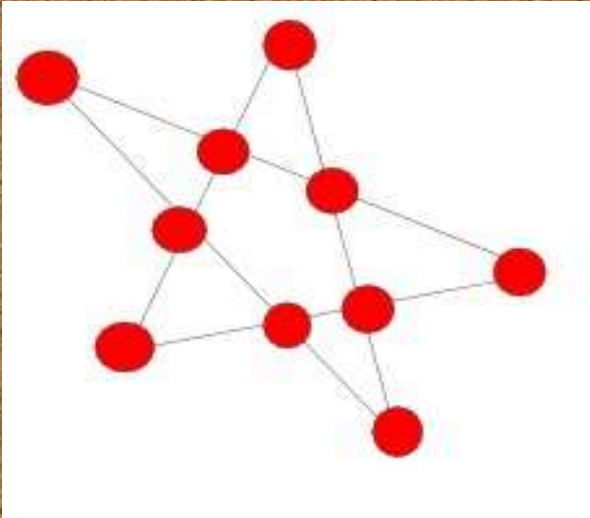

- 1. $(9/9)^3$
- 2. $(9+9)/9$
- 3. $\sqrt{9+9-9}$
- 4. $\sqrt{9+9/9}$
- 5. $\sqrt{9!-9/9}$
- 6. $9-9/\sqrt{9}$
- 7. $9-\sqrt{9+9}$

- 8. $9-9/9$
- 9. $9 \cdot \sqrt{(9^9)}$
- 10. $9+9/9$
- 11. $99/9$
- 12. $9+9/\sqrt{9}$

PUZZLE 2

Is it possible to place 10
bells in 5 lines having
exactly 4 bells in each line?

Article

ROBOT SALAMANDER

A new salamander robot was designed which can walk, swim and turn around corners. The new *salamander*-inspired bot is helping the scientist to understand, how the spinal cord orchestrates movement.

Salamanders are living fossils which are quite close in their motion to the *creatures which first stepped from the seas onto the land*. They also switch seamlessly between walking and swimming".

In water salamanders undulate called anguilliform swimming motion. The swimming movement is produced by a continuous wave of motion throughout the spinal cord. Stimulating the spinal cord more and more as by pressing a gas pedal which inform the headless salamander to switch to its swimming gait.

The robot salamander recreated the walking and swimming gaits which almost perfectly matched with the spinal cord circuit controlling whether the robot salamander swam or walked.

The findings of salamander reveal just how well the spinal cord seems to control the movement, which seems to be similar even in the human being. The brain of salamander will not worry about every muscle, it just worry about the high-level modulation and their job of the spinal cord which can coordinate all the entire muscles.

NEUROMORPHIC ENGINEERING

Neuromorphic chips aim to process information in a fundamentally different way, mimicking the brain's architecture to deliver a huge increase in a computer's thinking and responding power.

Neuromorphic engineering, also known as neuromorphic computing, is a concept developed by Carver Mead, had described the use of very-large-scale integration systems containing electronic analog circuits to mimic neuro-biological architectures present in the nervous system.

Suffering is the essence of success!

The major aspect of neuromorphic engineering is to understand how the morphology of individual neurons, circuits, apes, and overall architectures creates desirable computations.

Neuromorphic chips can be more energy efficient and powerful in combining data-storage and data-processing components into the same interconnected modules. So it will be the next stage in powerful computing, enabling more rapid processing of data and have a better capacity for machine learning.

Potential applications of this include drones better able to process and respond to visual cues. It is much more powerful and intelligent than cameras and smartphones and data-crunching or forecasting the climate. Computers will be able to anticipate and learn in pre-programmed ways.

Puzzle

Root Jigsaw Puzzle

Two of the four jigsaw tiles have the same sum of their roots. What are they?

$$\begin{aligned} \sqrt{2} + \sqrt{2} + \sqrt{3} & \\ &= \sqrt{3} + \sqrt{8} \\ \text{[as we know that,} & \\ \sqrt{8} &= 2 * \sqrt{2}] \end{aligned}$$

1996 Puzzle

MAKE THE NUMBERS
28, 32, 35, 38, 72, 73, 76, 77, 100, 1000 FROM
THE NUMERALS 1, 9, 9, 6 USING SOME
SYMBOLS LIKE +, -, *, /, √, ^.

T.SHANTHINI

B.HARIPRIYA

3RD IT-A

$$\begin{aligned} 28 &= 1 + 9 + \sqrt{9} * 6 \\ 32 &= (1 / \sqrt{9}) * 96 \\ 35 &= -19 + (9 * 6) \\ 38 &= 19 / (\sqrt{9} / 6) \\ 72 &= (1 + \sqrt{9}) * \sqrt{9} * 6 \\ 73 &= 19 + (9 * 6) \\ 76 &= 1 + (9 * 9) - 6 \\ 77 &= -19 + 96 \\ 100 &= 1 + \sqrt{9} + 96 \\ 1000 &= (1 + 9) ^ (9 - 6) \end{aligned}$$

LIVE TRANSLATION TOOL

The Skype Translator project offers the translation of both voice and written languages. Skype translation mission brings people together from all over the world. Skype Translator is now available in all Windows users.

The technique behind the translation involves advanced machine learning. Machine learning means that the more the technology is used, the smarter it gets. Skype Translator currently offers voice-to-voice translation for 7 languages including English, French, German, Italian, Mandarin, Portuguese, and Spanish.

This tool translates street signs and real-time conversations in a written language. Using IM, customers can write a text message in their own language, and the receiver will receive that message in their language of choice.

It provides a text format of your speech for the person on the other end, and also reads out what it thinks the translation is.

DISADVANTAGE:

In a conversation one speaks slowly. Skype Translator's speech recognition is good, plenty fast but that accuracy decreases.

4K TVs

Ultra-high-definition 4K televisions is going to pick up the steam, with the major manufacturers in full-blown push mode on the higher-resolution panels which offers 4 times the final resolution that of in ordinary Full HD TVs.

Aside from packing more pixels onto screens, the TV makers like Sony, Samsung and LG, are also adding high-dynamic-range technology, which is resulting in better colour ranges. 4K TV consists of display resolution at least four times greater than that of normal the 1080p HD and by its own industry standard which is specifically defined as 4096 x 2160 pixels.

To go with those 4K televisions, the manufacturers has planned to release 4K Blu-ray players with general offer sleeker designs which includes more features and better quality. Samsung, Philips are the two major companies that announced the devices at CES. Samsung is aiming to release it during the month of march but has not disclosed a price, while Philips' player is expected to put cost under \$400. Film studios also used CES to announce the products, with Warner Bro and will release 35 4K Blu-ray movies this year, including Mad Max: Fury Road and The Lego Movie.

ACCIDENT DETECTION

ANAGRAMS:

SCHOOLMASTER

THE
↓
CLASSROOM

OBJECTIVE:

1. To Reduce the Human Death Ratio due to Road Accident in India.
2. If accident takes place, quick transmission of message to preconfigured contacts to intimate the victims.
3. To provide maximum assistance even in unpopulated area.

VICTIM STATUS INDICATION SYSTEM:

The main purpose of this Android Smart Phone System is used to identify the accident occurrence and to detect the victim's status. The microcontroller based system hardware has been developed to acquire the various parameters such as accident location, heart rate and beat and body temperature at accident occurrence spot.

GPS AND GSM MODULE:

The Global Positioning System (GPS) is a space-based global navigation satellite system that provides reliable location and time information in all weather and at all times and anywhere on or near the Earth. This GPS module plays the vital role to predict the location of the accident in this work.

UPDATING INFORMATION:

In this module an emergency mode will be activated in user smart phone to send a sms alert in case of an accident occurs. The sms that includes the current location and current heart beat rate of the user. This proposed work will provide vital information about the accidents even in unpopulated area.

AIR INTO FRESH WATER

Watermill is an atmospheric water generator which converts air into fresh water. This latest technology invention produces fresh water at a cost of about 3 cents a liter (1 quart). It is originally designed for areas that do not have clean drinking water, the watermill is for households that prefer an ecofriendly, cost effective alternative to bottled water.

Atmospheric water generator convert air into water when the temperature of the air becomes saturated with enough water vapor that it begins to condense (dew point). It makes the appliance more efficient. It samples the air every 3 minutes to determine the most efficient time to convert the air into water. It will also tell that when to change the carbon filter and will shut itself off if it cannot make pure clean water.

HEY!!!! IT'S AN ARTICLE

THE 3D RUDDER

The 3DRudder is a revolutionary feet-controlled VR and 3D navigation and motion controller. The device is used while seated, all you have to do is simply rest your feet on it. To move forward, you tilt the device forward; to move to the right, you tilt the device to the right, and so on and so forth. Rotating the device implies a similar movement in the game or the CAD software. Up and down movements are managed by applying pressure to the right or the left of the platform. Game developers can use the pressure points to create combination to let you lock a target, jump, crawl...

Your PC will see 3DRudder as an HID joystick. Thus you'll be able to use it not only with your favourite VR headset but also with your existing PC games (as long as they let you change the input controller for movement). The 3DRudder doesn't cause any fatigue. Because the 3DRudder has no mechanical parts and uses your body's natural balance, you can play or work for hours, without fatigue.

YOUR HANDS ARE FREE TO DO MORE.. YOU HAVE THE EDGE!

3D SMART SHOE

The Smart shoe 015 will warm your feet with a tap in a smartphone app. They'll track your movement, your calorie burn, and even the wear and tear of the shoes themselves. Here's the McFly bit: they'll also tighten automatically around your ankle, so they fit exactly the way you want.

With a sharp, angular black-and-white look, they look kind of like moonboots- Way cooler moonboots. For the fainter of heart, Digit sole's also announcing a couple of saner-looking kicks. Warm Series—one pair looks like old-school Chuck Taylors, another's a set of pumps—has a lot of the tracking, all of the foot-warming, and none of the robot-feet looks.

ARTICLE WRITING

Android 6.0 Marshmallow

Marshmallow is one of the operating system to be used in future android mobiles. We all are familiar with the versions of android mainly with **Jelly Bean, Kitkat, and Lollipop**. And now we are going to know about the Marshmallow the latest version of android.

By,

D.Vignesh(15BIT003)

Information technology is playing a vital role in our life and making us happier and more helpful in our life and making our work faster and completing our work in simple manner and without information technology we will be not here with this sophisticated life. We forget many things in our life so we always back up the data. As Such that the software also backup by itself in marshmallow. Those options are:

Application permissions have been completely fixed in Android Marshmallow. Now you will be able to grant apps individual permissions to device functions, instead of the previous model of all or nothing.

FINGERPRINT SUPPORT Marshmallow will support fingerprint scanners on phones natively now. The new feature will allow the scanners to be used to not only unlock your device, but also use it authorize payments using Android Pay in the offline world or within Play Store apps.

Now on Tap takes the concept of the smart assistant Google now, and spreads it across the entire OS so you can take advantage of it on any screen, regardless of what you are doing. All you need to do, is simply press and hold the home button, and Now on Tap will analyses the information you are looking at, to give you related cards.

App links also known as Intents, is a feature where if you click on a link in your email or a text message, it asks you what app you would like to open it with. The same thing happens when you click on - for example - a video file or a Facebook link; you are shown all the app that can open the link and asked to choose the one you want to use.

Doze : One of the most common complaints faced by Android users has been unpredictable standby times on their phones. This happens because of apps running in the background, which can affect the standby time and performance. This is a new technology that learns over time and detects when your device is motionless and not being used, so it can be sent into a deep sleep mode.

Back up feature is something which has been missing from Android for years. With Android 6.0, you can set up automatic backups, which will back up apps and app settings of up to your Google Drive storage.

Number puzzles

Find the missing numbers??

SOLVE IF U R GENIUS
 $2 = 05$
 $3 = 10$
 $4 = 17$
 $5 = ??$

Check your common sense
If,
 $1 = 5$
 $2 = 25$
 $3 = 325$
 $4 = 4325$
Then,
 $5 = \dots????$

Solutions

Answer It..!
& Be Quick..!!!
 $7 - 4 + 3 \times 0 + 1 = \dots?$

ONLINE CERTIFICATION EXAM

(18.3.16)

PUZZLE

Guess the next number of this series

6, 14, 36, 98, ?

Next Number is 210

Find a number with its letters in alphabetical order.

Solution- Forty

it is the only number we know of in English with its letters in alphabetical order. And that is the correct spelling.

Find the value of Empty Circles??

2	1	6	9
7	3	8	18
9	5	4	18
18	9	18	

- 2+1+6=9(R)
- 2+7+9=18(C)
- 7+3+8=18(R)
- 1+3+5=9(C)
- 9+5+4=18(R)
- 6+8+4=18(C)

	1		9
		8	18
9			18
18	9	18	

90% Fail answer?

1 + 1 + 1 + 1 + 1
 1 + 1 + 1 + 1 + 1
 1 + 1 x 0 + 1 = ?

Solution-1

I don't have eyes, but once could see, I once had thoughts, but am now empty.

What am I?
