

DEPARTMENT OF MATHEMATICS

Programme: B. Sc. Mathematics

Vision

To be among the top ten centers of excellence in Mathematics at the national level through quality Mathematics education and research.

Mission

Department of Mathematics, through our enlightened management and committed faculty envisages to

- provide world-class education to the students of Mathematics
- give them a learning-centered environment
- ensure knowledge transfer
- instill research aptitude
- infuse ethical and cultural values
- transform our students into disciplined citizens in order to improve their quality of life.

Program Educational Objectives:

PEO1	The programme provides a strong foundation in breadth and depth of Mathematics and some specific areas of computer science which enables the student to pursue post-graduation in Mathematics, Applied Mathematics and computer applications.
PEO2	The programme also inculcate certain quantitative skills (self-confidence, leadership, decision making etc.) which would prepare students for managerial careers and transform the stakeholders into successful entrepreneurs.
PEO3	The practical and technical knowledge ensure significant and rewarding career opportunities in various service domains both National and Global level.
PEO4	The programme will stimulate logical and analytical reasoning that enables the students to crack competitive exams.
PEO5	With an interdisciplinary learning environment, the student develops necessary skills and values to handle diversified circumstances either individually or as a team.

Program Outcomes:

On successful completion of the B.Sc., Mathematics programme, Students can able to

PO1	develop confidence, positive attitude and interest towards Mathematics. (K1)
PO2	understand and apply basic concepts of Mathematics, Statistics and Physics and their importance in the solution of some real-world problems. (K2)
PO3	apply various Mathematical techniques within the domain and also extend to multi-disciplinary environment. (K3)
PO4	analyze and make critical observations of any situation with Mathematical approach and demonstrate ways to solve them logically with precision. (K4)
PO5	endorse independent learning and acquire sound knowledge to understand the basic branches of Mathematics. (K3)
PO6	have thorough grasp over the concepts which foster individual discipline, responsibility and commitment and ensure professional ethics. (K5)
PO7	formulate new problems and find the ideas to attain their solutions and develop the codes using C and C++ languages for simple problems. (K4)

Program Specific Outcomes:

PSO – 01	provide advanced knowledge on topics in pure and applied Mathematics, empowering the students to pursue higher degrees at universities and reputed academic institutions like NBHM, NIT, IIT, IISc etc.
PSO – 02	motivate and prepare students to clear civil service exams and to get employability in education, IT, Banking and insurance sectors and also to become successful entrepreneur .

N.G.M College - Curriculum Development Cell
B. Sc. Mathematics Scheme of Examination For 2021 - 2022
Choice Based Credit System & OBES

For Part I and Part II in First & Second Semesters Only

SEMESTER – I

Part	Subject Code	Title of the Paper	Hrs / Week		Exam Hrs.	Maximum Marks		Total Marks	Credits
			L	P		Internal	External		
I	21UTL101 /	Tamil Paper - I /	6	-	3	50	50	100	3

2. Python Training	Total Duration Hours:30

Question Paper Pattern

(Based on Bloom's Taxonomy)

K1-Remember; K2- Understanding; K3- Apply; K4-Analyze; K5- Evaluate

1. Theory Examinations: 70 Marks (Part I, II, & III)

(i) Test- I & II, ESE:

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q 1 -10)	A (Q 1 – 5 MCQ) (Q 6–10 Define/Short Answer)	10 x 1 = 10	MCQ Define	70 (Reduced to 50 for ESE)
K3 (Q 11-15)	B (Either or pattern)	5 x 4 = 20	Short Answers	
K4 & K5 (Q 16 – 21)	C (Q -16 is Compulsory and Q 17 – 21 answer any 3)	4 x 10 = 40	Descriptive/ Detailed	

2. Theory Examinations: 50 Marks (Part IV)

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q 1 -10)	A (Q 1 – 5 MCQ) (Q 6–10 Define / Short Answer)	10 x 1 = 10	MCQ Define	50 (Reduced to 25 for ESE)
K3, K4 & K5 (Q 11-18)	B (Answer 5 out of 8)	5 x 8 = 40	Short Answers	

3. Practical Examinations: 100/50 Marks

Knowledge Level	Criterion	External/Internal Marks	Total
K3	Record work & Practical	50/50	100
K4			
K5		25/25	50

* In Theory ESE, Students will write Examination Maximum Marks as 70 and it will be reduced to 50 for Total Mark calculation.

Components of Continuous Assessment

THEORY

Maximum Marks: 100; CIA Mark: 50

Components		Calculation	CIA Total
Test 1	$(70 / 4.67) = 15$	15+15+10+05+05	50
Test 2 / Model	$(70 / 4.67) = 15$		
Assignment / Digital Assignment	10		
Seminar / Socratic Seminar	05		
Group Task : GD, Role Play, APS	05		

Maximum Marks: 50; CIA Mark: 25

Components		Calculation	CIA Total
Test / Model	10	10+5+5+5	25
Assignment / Digital Assignment	5		
Seminar / Socratic Seminar	5		
Group Task : GD, Role Play, APS	5		

PRACTICAL

Maximum Marks: 50; CIA Mark: 25

Components		Calculation	CIA Total
Test / Model	15	15+5+5	25
Observation Note	5		
Record	5		

Maximum Marks: 100; CIA Mark: 50

Components		Calculation	CIA Total
Test / Model	30	30+5+15	50
Observation Note	5		
Record	15		

Maximum Marks: 200; CIA Mark: 100

Test / Model	60	60+10+30	100
Observation Note	10		
Record	30		

STUDENT SEMINAR EVALUATION RUBRIC

Grading Scale:

A	B	C	D
5	4	2 - 3	0 - 1

CRITERIA	A - Excellent	B - Good	C - Average	D - Inadequate
Organization of presentation	Information presented as interesting story in logical, easy to follow sequence	Information presented in logical sequence; easy to follow	Most of information presented in sequence	Hard to follow; sequence of information jumpy
Knowledge of subject & References	Demonstrated full knowledge; answered all questions with elaboration & Material sufficient for clear understanding AND exceptionally presented	At ease; answered all questions but failed to elaborate & Material sufficient for clear understanding AND effectively presented	At ease with information; answered most questions & Material sufficient for clear understanding but not clearly presented	Does not have grasp of information; answered only rudimentary Questions & Material not clearly related to topic OR background dominated seminar
Presentation Skills using ICT Tools	Uses graphics that explain and reinforce text and presentation	Uses graphics that explain text and presentation	Uses graphics that relate to text and presentation	Uses graphics that rarely support text and presentation
Eye Contact	Refers to slides to make points; engaged with audience	Refers to slides to make points; eye contact majority of time	Refers to slides to make points; occasional eye contact	Reads most slides; no or just occasional eye contact
Elocution – (Ability to speak English language)	Correct, precise pronunciation of all terms Voice is clear and steady; audience can hear well at all times	Incorrectly pronounces few terms Voice is clear with few fluctuations; audience can hear well most of the time	Incorrectly pronounces some terms Voice fluctuates from low to clear; difficult to hear at times	Mumbles and/or Incorrectly pronounces some terms Voice is low; difficult to hear

WRITTEN ASSIGNMENT RUBRIC

Grading Scale:

A	B	C	D	F
09 - 10	07- 08	05 - 06	03 - 04	01 - 02

CRITERION	A - Excellent	B - Good	C - Average	D - Below Average	F - Inadequate
Content & Focus	Hits on almost all content exceptionally clear	Hits on most key points and writing is interesting	Hits in basic content and writing is understandable	Hits on a portion of content and/or digressions and errors	Completely off track or did not submit
Sentence Structure & Style	<ul style="list-style-type: none"> * Word choice is rich and varies * Writing style is consistently strong * Students own formal language 	<ul style="list-style-type: none"> * Word choice is clear and reasonably precise * Writing language is appropriate to topic * Words convey intended message 	<ul style="list-style-type: none"> * Word choice is basic * Most writing language is appropriate to topic * Informal language 	<ul style="list-style-type: none"> * Word choice is vague * Writing language is not appropriate to topic * Message is unclear 	* Not adequate
Sources	Sources are cited and are used critically	Sources are cited and some are used critically	Some sources are missing	Sources are not cited	Sources are not at all cited
Neatness	Typed; Clean; Neatly bound in a report cover; illustrations provided	Legible writing, well-formed characters; Clean and neatly bound in a report cover	Legible writing, some ill-formed letters, print too small or too large; papers stapled together	Illegible writing; loose pages	Same as below standard
Timeliness	Report on time	Report one class period late	Report two class periods late	Report more than one week late	Report more than 10 days late

Programme Code:	B.Sc.	Programme Title:	B.Sc. Mathematics	
Course Code:	21UMS101	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	5	CLASSICAL ALGEBRA	Semester:	I
			Credits:	4

Course Objective

This course provides the learners a wide spectrum of basic mathematical concepts including summation of series, roots of an equation and matrices.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the basic concepts of sequences, series and convergence.	K1
CO2	apply the concepts of convergence and divergence of series using various tests like Cauchy's root test, D'Alembert's ratio test to solve problems.	K3
CO3	solve problems related to Binomial, Exponential and Logarithmic series.	K4
CO4	apply Newton's method of divisors and Horner's Method to analyze the nature of the roots.	K4
CO5	diagonalize the matrix using Cayley-Hamilton theorem.	K3

Mapping

CO5	H	H	H	H	H	H	H	H	H

H - HIGH; M - MEDIUM; L - LOW.

Units	Content	Hrs.
Unit I	Convergency and Divergency of Series: Some general theorems concerning infinite series – Series of positive terms – Comparison tests – Cauchy’s condensation test – D’Alembert’s Ratio test – Cauchy’s Root test –Raabe’s test. Text Book 1: Chapter 2: Sections: 11-20.	14
Unit II	Binomial theorem: Application of Binomial theorem to summation of series. Exponential and logarithmic series: The Exponential theorem – Summation - The logarithmic series - Modification of the Logarithmic series - Series which can be summed up by the logarithmic series. Summation of series: Application of partial fractions. Text Book 1: Chapter 3: Section: 10. Chapter 4: Sections: 2.3, 3.1, 5- 7,9, 9.1 (No derivations). Chapter 5: Sections: 2.1, 3.1, 3.2.	13
Unit III	Theory of equations: Symmetric function of roots- Newton’s Theorem on the sum of powers of the roots – To increase or decrease the roots of a given equation by a given quantity – Form of the quotient and remainder when a polynomial is divided by a binomial – <i>Removal of terms (Self study).</i> Text Book 1: Chapter 6:Sections: 12, 14 17-19.	13
Unit IV	Theory of equations: Multiple roots – Strum’s theorem – Solutions of numerical equations – Newton’s method of divisors – Horner’s Method. Text Book 1: Chapter 6: Sections: 26, 27, 28.1-28.3, 29.4, 30.	12
Unit V	Fundamental Concepts: Nilpotent – Idempotent – Unitary – Orthogonal Matrices – Related Problems. Characteristic roots and Characteristic vectors: The Characteristic equation of transformation-Properties of the Eigen vectors - Cayley-Hamilton theorem (statement only)-Diagonalization of a Matrix. Text Book 2: Chapter 1. Text Book 2: Chapter 4.	13
	Total Contact Hrs.	65

Pedagogy:

Direct Instruction, Flipped Class, Power Point Presentation.

Assessment Methods:

Course Objective

This paper enables the students to gain the ability to solve the problems related to multiple integrals, Beta and Gamma functions. It also provides the basic knowledge about Laplace transforms and use it to solve the differential equations.

Course Outcomes (CO)

On successful completion of this core paper, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the methods of solving ordinary differential equations.	K1
CO2	solve the linear differential equations with constant and variable coefficients.	K3
CO3	compute area and volume of the solids using multiple integrals	K3
CO4	analyze and apply the concepts of Laplace Transform, inverse Laplace Transform to solve linear ordinary differential equations with constant coefficients.	K4
CO5	expose differential equation as a powerful tool in solving problems in Physical and Social sciences.	K3

H - HIGH; M - MEDIUM; L - LOW.

Units	Content	Hrs.
Unit I	Linear differential equations with constant coefficients: Differential equation of higher order- The operators D and D-1 – Particular integral - Special methods of finding particular integral - Linear equations with variable coefficients – To find the particular integral – Special method of evaluating the P.I. when X is of the form xm. Text Book 2: Chapter 2: Sections: 1 - 4 & 8.	15
Unit II	Partial Differential Equations: Derivation of partial differential equations by elimination of arbitrary constants and by arbitrary functions - Different integrals of partial differential equations – Solutions of partial differential equations in some simple cases - Standard types of first order equations (Type IV - Self study) - Lagrange's equation Text Book 2 : Chapter 4: Sections: 1 - 6.	16
Unit III	Multiple Integrals: Definition of double integral - Evaluation of the double integral - Double integral in polar co-ordinates - Triple integrals – Applications of multiple integrals (problems only) Text Book 1 : Chapter 5: Sections: 1 - 5.	15
Unit IV	Change of Variables: Jacobians - Two important results regarding Jacobians - Change of variable in the case of two variables - Change of variable in the case of three variables - Transformation from Cartesian to polar co-ordinates - Transformation from Cartesian to spherical polar co-ordinates. Beta and Gamma Functions: Definitions - Convergence of Gamma functions - Properties of Beta functions - Relation between Beta and Gamma functions - Examples - Applications of Gamma functions to multiple integrals. Text Book 1 : Chapter 6 Chapter 7: Sections 2 - 6.	16
Unit V	The Laplace Transforms: Definitions - Transform of $f(t)$, e^{at} , $\cos at$, $\sin at$ and t^n when n is an integer - Using Laplace transforms to evaluate integrals - Inverse Laplace transforms (Self study)- Finding the Laplace transforms of functions to get the inverse transforms of functions--Laplace transforms to solve ordinary differential equation with constant coefficients. Text Book 2: Chapter 5: Sections 1,2,4 - 8.	16
	Total Contact Hrs.	78

Course Code:	21UMS1A1	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	6	MATHEMATICAL STATISTICS- I	Semester:	I
			Credits:	5

Course Objectives

The aim of this course is to introduce the concept of discrete and continuous random variables, probability functions, expectations, moment generating functions and some discrete and continuous distributions and should have developed skills to apply them to various real life situations.

Course Outcomes (CO)

On successful completion of this core paper, the students will be able to

CO Number	CO Statement	Knowledge level
CO1	understand the concepts of random variables and probability distributions in two dimensional space.	K2
CO2	compute expected value and variance of discrete and continuous random variables.	K3
CO3	understand and analyze the discrete distributions such as Binomial and Poisson distributions.	K4
CO4	analyze the continuous distributions such as normal, beta, gamma, exponential and rectangular distributions	K4
CO5	use statistical tool effectively to analyze real life problems and to be an efficient statistician.	K4

Units	Content	Hrs.
Unit I	<p>Random Variables and Distribution Functions: Two Dimensional Random Variables - Two Dimensional or Joint Probability Mass Function - Two Dimensional Distribution function - Marginal Distribution functions - Joint Density function - Marginal Density Function - The conditional Distribution Function and Conditional Probability Density function - Simple problems.</p> <p>Chapter 5: Sections: 5.5, 5.5.1 - 5.5.5.</p> <p>Mathematical Expectation: Introduction - Mathematical Expectation or Expected value of Random variable – Expected value of function of a Random variable - Properties of Expectation.</p> <p>Chapter 6: Sections: 6.1-6.4.</p>	16
Unit II	<p>Mathematical Expectation: Properties of Variance - Covariance – Variance of a linear combination of Random variables - Moments of Bivariate Probability Distributions - Conditional Expectation and Conditional Variance - Simple problems.</p> <p>Chapter 6: Sections: 6.5, 6.6, 6.6.1, 6.8, 6.9.</p> <p>Moment Generating Functions: Moment Generating Functions - Properties of Moment Generating Functions – Uniqueness Theorem of Moment Generating Functions - Cumulants - <i>Properties of Cumulants (Self study)</i> - Simple problems.</p> <p>Chapter 7: Sections: 7.1, 7.1.2, 7.1.3, 7.2, 7.2.1.</p>	15
Unit III	<p>Moment Generating Functions: <i>Characteristic Function (Self study)</i> - Properties of Characteristics Function - Chebychev's inequality - Simple problems.</p> <p>Chapter 7: Sections: 7.3, 7.3.1, 7.5.</p> <p>Special Discrete Probability Distributions: Binomial distribution - Moments of Binomial Distribution - Recurrence Relation for the Moments of Binomial Distribution - Moment Generating function of Binomial Distribution - Additive property of Binomial Distribution- Simple problems. Poisson distribution - Moments of Poisson distribution - Recurrence relation of Moments of the Poisson distribution - Moment Generating function of Poisson Distribution - Characteristics Function of the Poisson distribution – Cumulants of the Poisson distribution Additive or reproductive property of independent Poisson variates - Simple problems.</p> <p>Chapter 8: Sections: 8.4, 8.4.1, 8.4.2, 8.4.6, 8.4.7, 8.5, 8.5.2, 8.5.4, 8.5.5, 8.5.8</p>	16
Unit IV	<p>Special Continuous Probability Distributions: Normal distribution - Chief Characteristics of the Normal Distribution - M.G.F. of Normal distribution - C.G.F. of Normal distribution - Moments of Normal Distribution - A linear combination of independent normal variates - Simple problems. Rectangular</p>	15

	distribution - Moments of Rectangular distribution - MGF of Rectangular distribution - Characteristic function of Rectangular distribution - Mean Deviation about Mean -Simple problems. Chapter 9: Sections: 9.2, 9.2.2, 9.2.5, 9.2.6, 9.2.7, 9.2.8, 9.3-9.3.4.	
Unit V	Special Continuous Probability Distributions: Gamma Distribution - M.G.F. of Gamma distribution - C.G.F. of Gamma distribution - Additive property of Gamma Distribution - Beta distributions of first kind - Constants of Beta distributions of first kind - Beta distributions of second kind - Constants of Beta distributions of second kind - Exponential distribution - M.G.F. of Exponential distribution - Simple problems. Chapter 9: Sections: 9.5-9.5.3, 9.6, 9.6.1, 9.7, 9.7.1, 9.8, 9.8.1.	16
	Total Contact Hrs.	78

Hrs/Week	8		Credits :	4

Unit -1

Symmetric and Skew - Symmetric matrices - Hermitian and Skew - Hermitian matrices - Orthogonal and unitary matrices - Characteristic Equation of a matrix - Cayley-Hamilton's theorem (without proof) - Simple Problems.

Chapter 5: Sections: 5.8 - 5.23 and 5.50 - 5.67.

(Pg. No.: 5.8 to 5.23 and 5.50 to 5.67)[22 Hours]

Unit -2

Fundamental theorem in the theory of Equations - Relation between the roots and co-efficient of an Equation - Imaginary and Irrational roots.

Chapter 6: Sections: 6.1 - 6.17 and 6.19 - 6.25.

(Pg. No.: 6.1 to 6.17 and 6.19 to 6.25) [22 Hours]

Unit -3

Reciprocal Equation - Diminishing the roots of an Equation - Removal of term - Simple Problems.

Chapter 6 :Sections: 6.30 - 6.36 and 6.49 - 6.55.

(Pg. No. : 6.30 to 6.36 and 6.49 to 6.55)[21 Hours]

Unit -4

Summation of Binomial Series - Exponential series - Simple Problems.

Chapter 2: Sections: 2.4 - 2.10, Chapter 3 Sections: 3.1 - 3.9.

(Pg. No. : 2.4 to 2.10 and 3.1 to 3.9) [19 Hours]

Unit -5

Beta, Gamma Functions - Simple Problems.

Chapter 30 :Sections: 30.1 - 30.23.(Pg. No. : 30.1 to 30.23)[20 Hours]

Text Book:

Dr. Vittal P. R, *Allied Mathematics*, Fourth Edition, Margham Publications, Chennai, 2010.

Lecture Hrs./Week or Practical Hrs./Week	5	TRIGONOMETRY, VECTORCALCUL US AND FOURIER SERIES	Semester:	II
			Credits:	4

Course Objective

This paper enables the students to provide basic knowledge of trigonometry, vector calculus and Fourier series.

Course Outcomes (CO)

On successful completion of this course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the basic concepts of vector analysis, trigonometry, differentiation and integration.	K1
CO2	apply the differential operator to solve vector differential equations.	K3
CO3	solve the multiple integrals by applying Gauss divergence theorem, Stoke's theorem and Green's theorem.	K3
CO4	compute the expansion of trigonometric function as multiple of θ and a series of powers of θ .	K3
CO5	find Fourier series expansion for odd and even functions of a given period and can apply to solve problems in mathematical physics.	K3

			Credits:	4

Course Objective

This paper enables the student to gain fundamental ideas about co-ordinate geometry and gives clear knowledge about regular geometrical aspects and their properties in two and three dimensions.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recollect the basic properties of circle, sphere, parabola and hyperbola and can able to gain a deep knowledge in it.	K1
CO2	understand the ideas about the relation between polar and cartesian co-ordinates of geometric figures in solving simple problems.	K2
CO3	compute the equations of a chord to a circle and common tangents to a circle.	K3
CO4	solve problems relating to right circular cone, enveloping cone and general quadric cone.	K3
CO5	apply in real life problems in physics, engineering and computer graphics.	K3

Course Objective

The objective of this paper is to introduce the concepts about correlation, regression, sample theory, sampling distributions and theory of estimation.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the basics of regression line and the principles of least squares.	K2
CO2	apply the concept of correlation and rank correlation in real life situations.	K3
CO3	analyze the concepts of sampling techniques and procedure for testing of hypothesis for large samples.	K4
CO4	apply chi square, t and F distributions for testing of attributes as well apply the Cramer Rao- inequality for estimation.	K3
CO5	find good estimators for an unknown parameter using estimation theory	K3

Unit -1

Hyperbolic functions: Relations between circular and hyperbolic functions - Addition formula for hyperbolic functions - Problems.

Chapter 14: Sections: 14.31-14.37&14.40-14.55

(Pg. No. : 14.31 to 14.37 and 14.40 to 14.55)[21 Hours]

Unit -2

Laplace Transforms: Definition - Laplace transform of elementary function - Linear Property - Shifting Property - Change of scale property - Laplace transform of derivatives - Laplace transform of integrals - Multiplication by t - problems.

Chapter 27: Sections: 27.1 - 27.19 (Pg. No. : 27.1 to 27.19)[22 Hours]

Unit -3

Vector Differentiation: Gradient, Curl and Divergence - Problems.

Chapter 28: Sections: 28.7 - 28.51, 28.23, 28.26 - 28.33 and 28.36 - 28.43

(Pg. No.: 28.7 to 28.51, 28.23, 28.26 to 28.33 and 28.36 to 28.43)[21 Hours]

Unit -4

Line Integral - Surface Integral - Volume Integral - Simple Problems.

Chapter 29: Sections: 29.59 - 29.72 and 29.75 - 29.87.

(Pg. No. : 29.59 to 29.72 and 29.75 to 29.87).[20 Hours]

Unit -5

Green's theorem (without proof) - Simple Problems.

Chapter 29: Sections: 29.129 - 29.140

(Pg. No.: 29.129 to 29.140)[20 Hours]

Lecture Hrs./Week or Practical Hrs./Week	4		Credits:	2

List of programs:

1. Program for creating a matrix 5×4
2. Program for finding the characteristic equation of the 3×3 matrix
3. Program to illustrate the row vector problem in a given matrix $\begin{bmatrix} 6 & 43 & 2 & 11 & 87 \\ 12 & 6 & 34 & 0 & 5 \\ 34 & 18 & 7 & 41 & 9 \end{bmatrix}$
4. Program to illustrate the column vector problem in a given matrix $\begin{bmatrix} 2 & 4 & 6 & 8 & 10 \\ 3 & 6 & 9 & 12 & 15 \\ 7 & 14 & 21 & 28 & 35 \end{bmatrix}$
5. Program to illustrate the creation of sub matrix from a given 4×7 matrix
6. Program to finding the eigen values of the 3×3 matrix
7. Program to check the matrix 3×3 is symmetric or skew symmetric
 $4x - 2y + 6z = 8$
8. Program to solve the system of linear equations $2x + 8y + 2z = 4$
 $6x + 10y + 3z = 0$
9. Program to create a 6×6 matrix in which the middle rows and the middle two columns are 1's and the rest are zeros.
10. The following were the daily maximum temperature (in °F) in Washington In during the month of April, 2002: 58 73 73 53 50 48 56 73 66 69 63 74 82 91 93 89 91 80 59 69 56 64 63 66 64 74 63 69, (data from the U.S. National Organic and Atmospheric Administrations). Use relational and logical operations determine the following:
 - A) The number of days the temperature was above 75°
 - B) The number of days the temperature was between 65° and 80°
 - C) The days of the month that the temperature was between 50° and 60°
11. A worker is paid according to his hourly wage up to 40 hours, and 50% more for overtime. Write a program in a script file that calculates the pay to a worker. The programs ask the user to enter the number of hours and the hourly wage. The program the displays the pay.
12. A vector is given by $V=[5,17,-3,8,0,-1,12,15,20,-6,6,4,-7,16]$. Write a program as a script file that doubles the elements that are positive and are divisible by 3 and/or 5, and raise to the power of 3 the elements that are negative but greater than -5.
13. For the polynomial $f(x) = x^5 - 12.1x^4 + 40.59x^3 - 17.015x^2 - 71.95x + 35.88$
 - a) Calculate $f(9)$
 - b) Calculate $f(x)$ for $0 \leq x \leq 10$
14. Create 3×3 matrix to demonstrate that matrix multiplication is not commutative.
15. Program to find the first and second derivative of $f(x) = x^5 - 12.1x^4 + 40.59x^3 - 17.015x^2 - 71.95x + 35.88$

16. Program to find the first and second derivative of $f(x) = e^{3x+2}$
17. Program to find the first and second derivative of $f(x) = 2 + \log x$
18. Program to find $\int_0^{\infty} e^{-x^2} (\ln x)^2 dx$
19. Program to find $\int_0^{\frac{\pi}{2}} \sin^2(2x) dx$
20. Program to find $\int_{-\infty}^{\infty} \frac{1}{a^2+x^2} dx$
21. Program for divide the polynomial $15x^5 + 35x^4 - 37x^3 - 19x^2 + 41x - 15$ by polynomial $5x^3 - 4x + 3$

		ANCILLARY MATHEMATICS FOR PHYSICS-II	Semester	II
Hrs/Week	6		Credits :	4

Unit -1

Hyperbolic functions: Relations between circular and hyperbolic functions - Addition formula for hyperbolic functions - Problems.

Chapter 14: Sections: 14.1 - 14.37 and 14.40 - 14.57.

(Pg. No. : 14.1 to 14.37 and 14.40 to 14.57)[21 Hours]

Unit -2

Laplace Transforms: Definition - Laplace transform of elementary function - Linear Property - Shifting Property - Change of scale property - Laplace transform of derivatives - Laplace transform of integrals - Multiplication by t - Problems.

Chapter 27: Sections: 27.1 - 27.19. (Pg. No. : 27.1 to 27.19),[22 Hours]

Unit -3

Vector Differentiation: Gradient, Curl and Divergence - Simple Problems.

Chapter 28: Sections: 28.8 - 28.51. (Pg. No. : 28.8 to 28.51).[21 Hours]

Unit -4

Line Integral - Surface Integral - Volume Integral - Simple Problems.

Chapter 29: Sections: 29.59 - 29.72 and 29.75 - 29.87.

(Pg. No. : 29.59 to 29.72 and 29.75 to 29.87).[20 Hours]

Unit -5

Exponential series-simple problems.

Chapter 3: Sections:3.1 to 3.9

(Pg. No. : 3.1 to 3.9).[20 Hours]

List of programs:

22. Program for creating a matrix 5×4
23. Program for finding the characteristic equation of the 3×3 matrix
24. Program to illustrate the row vector problem in a given matrix $\begin{bmatrix} 6 & 43 & 2 & 11 & 87 \\ 12 & 6 & 34 & 0 & 5 \\ 34 & 18 & 7 & 41 & 9 \end{bmatrix}$
25. Program to illustrate the column vector problem in a given matrix $\begin{bmatrix} 2 & 4 & 6 & 8 & 10 \\ 3 & 6 & 9 & 12 & 15 \\ 7 & 14 & 21 & 28 & 35 \end{bmatrix}$
26. Program to illustrate the creation of sub matrix from a given 4×7 matrix
27. Program to finding the eigen values of the 3×3 matrix
28. Program to check the matrix 3×3 is symmetric or skew symmetric
 $4x - 2y + 6z = 8$
29. Program to solve the system of linear equations $2x + 8y + 2z = 4$
 $6x + 10y + 3z = 0$
30. Program to create a 6×6 matrix in which the middle rows and the middle two columns are 1's and the rest are zeros.
31. The following were the daily maximum temperature (in °F) in Washington In during the month of April, 2002: 58 73 73 53 50 48 56 73 66 69 63 74 82 91 93 89 91 80 59 69 56 64 63 66 64 74 63 69, (data from the U.S. National Organic and Atmospheric Administrations). Use relational and logical operations determine the following:
D) The number of days the temperature was above 75°
E) The number of days the temperature was between 65° and 80°
F) The days of the month that the temperature was between 50° and 60°
32. A worker is paid according to his hourly wage up to 40 hours, and 50% more for overtime. Write a program in a script file that calculates the pay to a worker. The programs ask the user to enter the number of hours and the hourly wage. The program the displays the pay.
33. A vector is given by $V=[5,17,-3,8,0,-1,12,15,20,-6,6,4,-7,16]$. Write a program as a script file that doubles the elements that are positive and are divisible by 3 and/or 5, and raise to the power of 3 the elements that are negative but greater than -5.
34. For the polynomial $f(x) = x^5 - 12.1x^4 + 40.59x^3 - 17.015x^2 - 71.95x + 35.88$
c) Calculate $f(9)$
d) Calculate $f(x)$ for $0 \leq x \leq 10$
35. Create 3×3 matrix to demonstrate that matrix multiplication is not commutative.
36. Program to find the first and second derivative of $f(x) = x^5 - 12.1x^4 + 40.59x^3 - 17.015x^2 - 71.95x + 35.88$

37. Program to find the first and second derivative of $f(x) = e^{3x+2}$
38. Program to find the first and second derivative of $f(x) = 2 + \log x$
39. Program to find $\int_0^{\infty} e^{-x^2} (\ln x)^2 dx$
40. Program to find $\int_0^{\frac{\pi}{2}} \sin^2(2x) dx$
41. Program to find $\int_{-\infty}^{\infty} \frac{1}{a^2+x^2} dx$
42. Program for divide the polynomial $15x^5 + 35x^4 - 37x^3 - 19x^2 + 41x - 15$ by polynomial $5x^3 - 4x + 3$

			Credits:	4

Course Objective

This course provides a thorough knowledge about the characteristics of Projectiles, Energies during impact and Collision. Each topic involves problems to solve which develops the application skills and thinking process of the students.

Course Outcomes (CO)

On successful completion of this course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the notions of matter, velocity, acceleration , force, momentum , moment of inertia etc.,	K1
CO2	understand the concept of projectile motion and solving some simple problems related to it.	K2
CO3	calculate radial and transverse components of velocity and acceleration, areal velocity of central orbits, describe the differential equation and pedal equation of central orbits.	K3
CO4	apply the concepts of composition of simple harmonic motion in two directions.	K3
CO5	analyze the concept of impulse, impulsive forces, direct & oblique impact of elastic bodies under collision and solve simple problems.	K4

Lecture Hrs./Week or Practical Hrs./Week	4	NUMERICAL TECHNIQUES	Semester:	III
			Credits:	3

Course Objective

This course helps the students to have an in-depth knowledge of various advanced methods in numerical analysis. The students to use numerical techniques to get numerical solutions of equations like transcendental and non-linear differential equations when ordinary analytical methods fail.

Course Outcomes (CO)

On successful completion of this core paper, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the need of numerical analysis techniques in the areas of approximation theory, and recall some basic concepts.	K1
CO2	apply the numerical methods for approximating the solution to problems of algebraic and transcendental equations, simultaneous linear equations.	K3
CO3	estimating the value of a function for any intermediate value of the independent variable using Newton Forward and Backward interpolation Formula as well compute the derivatives using Newton's forward and backward difference formula and Sterling's formula.	K3
CO4	solve the ordinary and partial differential equations by using Numerical method techniques like Taylors method, Euler's method, RungeKutta method etc.	K4
CO5	enrich the knowledge of numerical techniques and getting insight of algorithmic approach.	K4

Units	Content	Hrs.
Unit I	<p>The solution of Numerical Algebraic and Transcendental Equations: Introduction - The Bisection method - The iteration method - The method of false position (Regula Falsi Method) - Newton Raphson method. Chapter 3: Sections: 1 - 5.</p> <p>Simultaneous Linear Algebraic Equations: Introduction – Gauss Elimination Method – Gauss Jordan Method – Computation of the inverse of a Matrix using Gauss’s Elimination Method. Chapter 4: Sections: 1 – 3.</p>	11
Unit II	<p>Simultaneous Linear Algebraic Equations: Iterative Methods - Gauss-Jacobi Method – Gauss-Seidal Method – <i>Comparison of Gauss elimination and Gauss-Seidal Iteration methods (Self study).</i> Chapter 4: Sections: 6, 7.</p> <p>Interpolation: Introduction - Linear interpolation - Gregory Newton Forward and Backward interpolation Formula - Equidistant terms with one or more missing values. Chapter 6: Sections: 1 - 5.</p>	10
Unit III	<p>Numerical Differentiation: Introduction - Newton’s forward difference formula to compute the derivatives - Newton’s backward difference formula to compute the derivatives - Derivatives using Stirling’s formula. Chapter 9: Sections: 1 - 4.</p> <p>Numerical Integration: The Trapezoidal rule - Romberg’s method - Simpson’s one third rule - Practical applications of Simpson’s rule. Chapter 9: Sections: 8 -10 and 12.</p>	10

Unit IV	Numerical Solution of Ordinary Differential Equations: Solution by Taylor Series - Taylor Series method for higher order differential equations- Euler's method - Improved Euler's method - Modified Euler method - RungeKutta method - Second order RungeKutta Method - <i>Higher order RungeKutta methods (Self study).</i> Chapter 11: Sections: 6, 8, 10 - 15.	10
Unit V	Numerical Solution of Partial Differential Equations: Elliptic equations – Solution of Laplace's equation by Iteration – Poisson's equation. Chapter 12: Sections: 5, 6, 7.	11
	Total Contact Hrs.	52

Course Objective

The objective of this syllabus is to make the students to clear competitive examination like Banking recruitment, Postal recruitment, Railway recruitment and TNPSC exams.

Course Outcomes (CO)

On successful completion of this course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the necessary fundamentals to take up the course	K2
CO2	solve simple problems related to percentage , profit & loss, ratio & proportion.	K3
CO3	apply the concepts of probability, permutations and combinations in solving real life problems.	K3
CO4	develop logical thinking, problem solving skills and time management.	K4
CO5	clear competitive exams in banking, Postal and railway services, IT, etc..	K4

Course Objective

This course enables a deep knowledge about the concept of Forces, Moments, Friction, Gravity and resultant of more than one force acting on a surface. It also includes simple problems in each topic which develops the application skills of the students in solving them.

Course Outcomes(CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the basic concepts like friction, centre of gravity, moments.	K1
CO2	apply the concepts of parallel forces and moments, use them to solve problems.	K3
CO3	apply and solve the problems in coplanar forces, couples forces and resultant of more than one force acting on a surface.	K3
CO4	analyse the concepts of friction and centre of gravity.	K4

CO5	enrich the knowledge in this course to pursue higher degree and get employability.	K3

			Credits:	4

Course Objective

The prime objective of this paper is to introduce certain OR techniques such as LPP, Transportation problems, Assignment problems, Sequencing and Replacing models to help the students to develop logical reasoning for applying mathematical tools to managerial and real life oriented problems.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	formulate real world problems as an LP model and explain the relationship between a linear program and its dual.	K2
CO2	solve linear programming problems using appropriate techniques and interpret the results.	K3
CO3	understand and solve replacement problems, build and solve specialized linear programming problems like transportation and assignment problems.	K3

CO4	effectively communicate ideas, explain procedures, devise optimum allocations, interpret results and make firm decisions.	K4
CO5	identify and develop operational research models from the verbal description of the real system in the areas of management science, industry, engineering fields and transportation.	K4

Course Objective

The objective of this syllabus is to make the students to clear competitive examination like Banking recruitment, Postal recruitment, Railway recruitment and TNPSC exams.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the necessary fundamentals to take up the course	K2

CO2	solve simple problems related to problems on ages , problems on trains and boats and streams.	K3
CO3	apply the concepts of time and work, time and distance in solving real life problems.	K3
CO4	develop logical thinking, problem solving skills and time management.	K4
CO5	clear competitive exams in banking, Postal and railway services, IT, etc..	K4

			Credits:	2

Course Objective

This paper enables the learners to learn about the Moon and Ellipses.

Course Outcomes (CO)

After successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the basic knowledge of the Moon.	K2

CO2	acquire the facts in Eclipses.	K2
CO3	know the concept of planetary Phenomena.	K3
CO4	find the application of Astronomical Instruments like sidereal clock and chronometer.	K4
CO5	evaluate the Heliocentric motion of a planet	K4

Lecture Hrs./Week or Practical Hrs./Week	6	MODERN ALGEBRA	Semester:	V
			Credits:	4

Course Objective

To promote a better understanding of algebra and provides an adequate foundation for further study in abstract algebra and its applications in various branches of Mathematics.

Course Outcomes (CO)

On successful completion of this core paper, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the algebraic structures such as sets, mappings, relations, groups, rings and field.	K2

CO2	understand the properties of groups, subgroups and applying in simple proofs and solving problems.	K3
CO3	apply the results from group theory to study the properties of rings and fields and to possess the ability to work within their algebraic structures.	K3
CO4	understand and analyze the concepts of group homomorphism, isomorphism for groups, rings and Euclidian rings.	K4
CO5	enrich the knowledge in algebra to pursue higher degree and choose a teaching career.	K4

		REAL ANALYSIS - I	Semester:	V
Lecture Hrs./Week or Practical Hrs./Week	6		Credits:	4

Course Objective

To enable the learner to get into basic concepts of Real Analysis and obtain a foundation for further study in analysis.

Course Outcomes (CO)

On successful completion of the course student will be able to

CO Number	CO Statement	Knowledge Level
-----------	--------------	-----------------

CO1	demonstrate the fundamental properties of the real numbers which underpin the formal development of real analysis.	K2
CO2	apply the concepts of closure and interior of sets, continuity, convergence to effectively communicate mathematics.	K3
CO3	calculate the limits of various types of sequences, discuss the nature of continuity and analyze their properties.	K3
CO4	analyze the applications of intersection theorem, covering theorems and Bolzano-Weierstrass theorem.	K4
CO5	understand the structure of a metric space and deal with the notions of continuity, completeness and connectedness.	K2

			Credits:	4

Course Objective

The prime objective of this paper is to introduce certain OR techniques such as game theory, sequencing and networking models to help the students to develop logical reasoning for applying mathematical tools to managerial and other life oriented problems.

Course Outcomes (CO)

On successful completion of the course student will be able to

CO Number	CO Statement	Knowledge Level
-----------	--------------	-----------------

CO1	recall and apply linear programming techniques to develop and solve simple models of Game theory.	K2
CO2	determine the optimal sequence of allocation of jobs to machines in a production line by minimizing the idle time.	K3
CO3	comprehend several queuing system models and extend the same to practical situations, develop network models and analyze a project with deterministic and probabilistic activity times.	K4
CO4	identify the importance of stocks, need for holding stocks and determine the optimum order quantity based on the available constraints.	K4
CO5	make constructive decisions and use the resources (labor, capital, materials, machinery) more effectively by analyzing & applying the techniques of operations research to problems in engineering, industry, management or any business environment.	K4

			Credits:	4

Course Objective

This course exposes the elementary basic theory of numbers and several famous functions, related theorems and some unsolved problems about primes to the students in order to enable them to deeper their understanding of the subject.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the concepts of divisibility, congruence, greatest common divisor and prime-factorization.	K2
CO2	apply the properties of multiplicative functions such as the Euler phi-function and quadratic residues to solve the problems of number theory.	K3
CO3	demonstrate the concepts of linear congruence and polynomial congruence using Fermat's Theorem and Wilson's Theorem.	K3
CO4	analyze and solve linear Diophantine equations, congruences of various types and evaluate the unsolved problems about primes.	K4
CO5	clear competitive exams in banking, insurance, TNPSC and UPSC.	K3

Programme Code:	B.Sc.	Programme Title:	B.Sc. Mathematics	
Course Code:	21UMS5E1	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	4	PROGRAMMING IN 'C'	Semester:	V
			Credits:	3

Course Objective

C is a general- purpose structured programming language that is powerful, efficient and compact. The programming language C finds a wide variety of applications in the development of software. This course provides the students with all the fundamental concepts of the C language with some

practical experience. Also helps the students to develop their programming skills and to build large programs.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the keywords, C-data types and variables .	K2
CO2	apply the use of statements and looping structures.	K3
CO3	analyze the concepts of user-defined functions, in-built functions and nesting of functions	K4
CO4	acquire knowledge about use of multi-dimensional arrays & pointers.	K3
CO5	sense the basic structure of C program and apply them to small projects.	K3

Units	Content	Hrs.
Unit I	<p>Overview of C: History of C - Importance of C - Basic Structure of C Programs</p> <p>Constants ,Variables and Data Types: Introduction - Character set - C Tokens - Keywords and identifiers - Constants - Variables - Data types - Declaration of variables - Assigning values to variables - Defining symbolic constants</p> <p>Operators and Expressions:Introduction -Arithmetic operators - Relational operators - Logical operators - Assignment operators - increment and Decrement operators - conditional operators- Bitwise operators- Special operators - Arithmetic expressions - Evaluation of expressions - <i>Precedence of arithmetic operators (Self study)</i> - Type conversions in expressions - Operator precedence - Mathematical functions.</p> <p>Chapter 1: Sections : 1.1,1.2,1.8, Chapter 2: Sections : 2.1-2.8,2.10,2.11</p> <p>Chapter 3: Sections : 3.1-3.12, 3.14-3.16</p>	11

Unit II	<p>Managing Input and Output Operations: Introduction - Reading a character - writing a character - Formatted input - Formatted output.</p> <p>Decision Making and Branching: Introduction - Decision making with if statement - Simple if statement - The If ... else statement - Nesting of if ... else statements - The else if ladder - The switch statement - The ?: operator - The Go to statement.</p> <p>Decision Making and Looping: Introduction - The while statement - The do statement - The for statement - Jumps in loops - Simple programs.</p> <p>Chapter 4: Sections: 4.1- 4.5, Chapter 5: Sections : 5.1-5.9 , Chapter 6: Sections :6.1-6.5.</p>	11
Unit III	<p>Arrays:Introduction - One dimensional arrays - Declarations of One dimensional arrays - Initializations of One dimensional arrays - Two dimensional arrays - Initializing Two dimensional arrays.</p> <p>Arrays and Strings: Introduction - Declaring and initializing string variables - Reading strings from terminal - Writing strings to screen - Arithmetic operations on characters - Putting strings together - comparison of two strings - String handling functions - <i>Table of strings (Self study)</i>.</p> <p>Chapter 7: Sections: 7.1 - 7.6 , Chapter 8: Sections : 8.1 - 8.9.</p>	10
Unit IV	<p>User defined Functions: Introduction - Need for user defined functions - Multi-function Program - Elements of user defined functions - Definitions of functions - Return values and their types - Function Calls - Function Declaration - Category of Functions - No arguments and no return values - Arguments but no return values - Arguments with return values - No arguments but returns a value - Functions that return multiple values - Nesting of functions - Recursion.</p> <p>Chapter 9 :Sections : 9.1 - 9.16</p>	10
Unit V	<p>Pointers: Introduction - Understanding pointers - Accessing the address of a variable - Declaring pointer variables - Initialization of pointer variables - Accessing a variable through its pointer - Chain of Pointers - Pointer expressions - Pointer increments and scale factor - Pointers and arrays - Pointers and characters strings - Array of Pointers - Pointers as function arguments - Functions returning Pointers - Pointers to Functions .</p> <p>Chapter 11: Sections: 11.1-11.15.</p>	10
	Total Contact Hrs.	52

Pedagogy:

Direct Instruction, Flipped Class, Power Point Presentation.

Course Objective

On successful completion of the course the students are able to understand the concepts

of problem solving logics, reasoning knowledge, Decision making, Learning with searches and algorithms.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	To recall the basic logical searches, learning algorithms and improve decision making systems.	K1
CO2	To Summarize the idea about knowledge representation and reasoning	K2
CO3	To illustrate new knowledge with probabilistic reasoning solutions	K3
CO4	To Analyze Decision making system and its different process	K4
CO5	To evaluate the learning skills with many observations and machine learning algorithms	K5

Course Objectives

The course is designed to provide a practical exposure to the students on 'C' language.

Course Outcomes (CO)

On completion of the course the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	write the programming code to understand the concepts of looping structure and conditional statements.	K3
CO2	write the programming code for matrix operations to understand the array concepts	K3
CO3	write the programming code using user-defined functions and nesting of functions	K3
CO4	write the programming code using pointers	K4
CO5	enrich the programming knowledge and debugging .	K3

List of Programs:

1. Program to convert the given temperature in Fahrenheit to Celsius.
2. Program to convert days into months and days.
3. Program to find the solution of quadratic equation.
4. Program for finding Fibonacci sequence.
5. Program to sort a list and find its median.
6. Program to sort a list in ascending / descending order.
7. Program to calculate mean and standard deviation of a given series of numbers.
8. Program for finding the addition of two matrices.
9. Program for finding the multiplication of two matrices.
10. Program to find trace of a square matrix.
11. Program to sort a list of strings in alphabetical order.

12. Program to compute nCr value.
13. Program to check whether the number is prime or not.
14. Program to check whether the year is leap year or not.
15. Program to illustrate the use of pointers in one dimensional array.

Lecture Hrs./Week or Practical Hrs./Week	-	ADVANCED LEARNER COURSE (OPTIONAL): ADVANCED OPERATIONS RESEARCH - I	Semester:	V
			Credits:	4*

Course Objective

The course aims to introduce some OR techniques like Integer programming, Gold programming, dynamic programming etc. to build capabilities in students for analyzing different business situations involving

limited resources and obtained logical solutions.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall Linear programming techniques, understand and apply advanced techniques in linear programming and duality to real life problems	K2 & K3
CO2	understand and solve variety of problems such as replacement problems, transportation problem etc.	K2 & K3
CO3	sketch the theoretical workings of Integer programming, Goal programming, Dynamic programming problems and their solution procedures.	K3
CO4	analyze any real system and formulate Mathematical models.	K4
CO5	make effective decisions under various business situations by applying appropriate optimization techniques.	K4

		LINEAR ALGEBRA	Semester:	VI
Lecture Hrs./Week or Practical Hrs./Week	6		Credits:	4

Course Objective

To enable the students to study how to solve system of linear algebraic equations, basic concepts

of an algebraic structure namely vector space and its properties of linear transformations on vector spaces and their relation between matrices.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	solve systems of linear equations and to reduce the augmented matrix to echelon form or to row reduced echelon form.	K3
CO2	understand the basic ideas of vector spaces and the concepts of span, linear independence, basis, dimension and to apply these concepts to vector spaces and subspaces.	K2
CO3	find row space, column space, null space,rank and nullity of a matrix and to understand the relationship of these concepts to associated systems of linear equations.	K3
CO4	apply the principles of matrix algebra to linear transformations and analyze the competence with the basic ideas in Vector spaces, Dual spaces and linear transformation.	K4
CO5	enrich the knowledge in Linear Algebra to pursue higher degree in Mathematics and other discipline, as well to get employability in education field and IT sectors.	K4

Lecture Hrs./Week or Practical Hrs./Week	6	REAL ANALYSIS – II	Semester:	VI
			Credits:	4

Course Objective

To equip the students for study in Real analysis by introducing further some of advanced topics in Real Analysis.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand and use abstract mathematical concepts of derivatives and functions of bounded variation.	K2
CO2	apply the properties of monotonic functions and continuous functions of bounded variation in the context of real analysis.	K3
CO3	apply the ideas of total variation and step into the theory of Riemann Stieltjes Integral.	K3
CO4	analyze the Riemann Integral and Riemann-Stieltjes integral in detail and write complete, correct and coherent proofs.	K4
CO5	enhance higher order learning and demonstrate how abstract ideas in real analysis can be applied to practical problems.	K4

Course Code:	21UMS615	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	5	COMPLEX ANALYSIS	Semester:	VI
			Credits:	4

Course Objective

This course help the students to have an in depth knowledge of limits and continuity, analytic functions, uniform convergence, conformal mapping and Singularities.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the fundamental ideas of the functions of complex variables and complex integrals.	K2
CO2	analyze the concepts of sequences and series of complex functions to generate Taylor series and Laurent series.	K3
CO3	analyze integrals along a path in the complex plane by applying Cauchy integral formula and its various versions.	K3
CO4	apply the concept of line integrals in fundamental theorems like Cauchy theorem for rectangle and Cauchy theorem for disc.	K3
CO5	determine zeros and poles of simple functions, find the nature of the singularities and hence to calculate residues.	K3

Units	Content	Hrs.
Unit I	Introduction to the concept of analytic function: Limits and Continuity – Analytic functions - Polynomials - <i>Rational Functions. (Self study)</i> Chapter 1: Sections: 1.1 - 1.4.	14

Unit II	Elementary theory of power series: Sequences - Series - Uniform Convergence - Power Series - Abel's Limit Theorem. Chapter 2: Sections: 2.1 - 2.5.	13
Unit III	The Exponential, Trigonometric Functions and Conformality: <i>The Exponential –The Trigonometric Functions (Self study)</i> - The periodicity – The Logarithm - Arcs and Closed Curves - Analytic Functions in Regions - Conformal Mapping. Chapter 2: Sections: 3.1 - 3.4 Chapter 3: Sections: 2.1 - 2.3.	13
Unit IV	Fundamental Theorems : Line Integrals – Line Integrals as Function of Arcs – Cauchy's Theorem in a Rectangle - Cauchy's Theorem in a Disc – The Index of a Point with respect to a Closed Curve - Cauchy's Integral Formula. Chapter 4 : Sections: 1.1, 1.3, 1.4, and 1.5. Chapter 4: Sections: 2.1- 2.2.	13
Unit V	Local Properties of Analytic functions: Removable Singularities, Taylor's Theorem – Zeros and Poles - The Local Mapping – The Maximum Principle. Chapter 4 : Sections: 3.1- 3.4.	12
	Total Contact Hrs.	65

Pedagogy:

Direct Instruction, Flipped Class, Power Point Presentation.

Lecture Hrs./Week or Practical Hrs./Week	5	MATHEMATICS	Credits:	5
---	---	-------------	-----------------	---

Course Objective

In this course a set of topics that are of genuine use in computer science and elsewhere are identified and combined together in a logically coherent fashion, to enable the students to get a good training in these topics which will inevitably lead the students in the direction of clear thinking, sound reasoning and a proper attitude towards the applications of Mathematics in computer science and other related fields.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the basic definitions of logic, lattice theory, graph theory and automata theory.	K2
CO2	acquire knowledge about discrete structures which include sets, relations, functions, graphs and recurrence relations.	K3
CO3	analyze how lattices and Boolean algebra are used as tools and mathematical models in the study of networks.	K4
CO4	apply logically valid forms of arguments to avoid logical errors and to construct mathematical arguments using logical connectives and quantifiers.	K4
CO5	apply the concepts to the field of computer science, information technology, cryptography and software engineering.	K3

Mapping

---	---	--	-----------------	---

Course Objective

Graph theory is a major area of Combinatorics. In this Course we introduce the learners to some basic topics in graph theory.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	recall the basic concepts and definitions of graphs along with types and their examples.	K1
CO2	demonstrate the concepts of connectivity and line connectivity.	K3
CO3	compare the features of Eulerian graphs and Hamiltonian graphs.	K4
CO4	apply the concept of directed graphs to solve network flow problems.	K3
CO5	relate the graph theory to the real world problems.	K4

Mapping

PO /PSO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2

Course Objective

The aim of this course is to know all needed about C++ and object oriented programming and also to meet the global requirements in software industries.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the basics of tokens, expressions and control structures.	K2
CO2	understand and apply the concepts of functions, classes, objects.	K3
CO3	analyze the concepts of single inheritance, multiple inheritance, call by function, call by reference of a function and polymorphism.	K4
CO4	analyze the use of operator overloading and type conversions.	K4
CO5	develop program codes effectively using OOPS.	K5

			Credits:	3

Course Objective

To impart knowledge on Industry 4.0, need for digital transformation and the following Industry 4.0 tools:

1. ArtificialIntelligence
2. Big Data and DataAnalytics
3. Internet ofThings

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Know the reason for adopting Industry 4.0 and Artificial Intelligence.	K1
CO2	Understand the need for digital transformation.	K2
CO3	Apply the industry 4.0 tools.	K3
CO4	Analyze the applications of Big Data .	K4
CO5	Examine the applications and security of IoT Applications.	K4

List of programs:

1. Program to find the Mean and variance
2. Program to find the largest of two numbers using nesting of member functions
3. Program to illustrate the use of array of objects
4. Program to illustrate the use of objects as arguments
5. Program to swap private data of classes using friend function
6. Program to illustrate overloaded constructors
7. Program to illustrate matrix multiplication
8. Program to illustrate the use of 'new' in constructors
9. Program to illustrate overloading + operators
10. Program to explain single inheritance
11. Program to illustrate multilevel inheritance
12. Program to explain hybrid inheritance
13. Program to illustrate the use of initialization lists in the base and derived constructors
14. Program to illustrate the use of pointers to objects
15. Program to illustrate runtime polymorphism

Lecture Hrs./Week or Practical Hrs./Week	-	ADVANCED LEARNER COURSE (OPTIONAL): ADVANCED OPERATIONS RESEARCH - II	Semester:	V
			Credits:	4*

Course Objective

The course aims to expose non-linear programming and simulation. Further it helps the student to understand different computational algorithms used in solving non-linear programming problems. The course also enables to schedule projects and build mathematical models to study the real world system.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand non-linear programming problems and familiarize different solving procedures	K2& K3
CO2	formulate and solve non-linear programming problems using appropriate techniques and interpret the results.	K3
CO3	simulate Various real life probabilistic situations using methods like Monte Carlo simulation	K4
CO4	analyze the resources efficiently under various constrains and estimate the probability of completing a project on time.	K4
CO5	develop critical and analytical skills that enable to apply optimization techniques constructively to any business environment and draw wise decisions.	K4

Course Code:	21UMS6S1	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	1	FINANCIAL MATHEMATICS -II	Semester:	VI
			Credits:	2

Course Objective

The course on financial mathematics focuses on the mathematical properties and relations between concepts of financial and currency markets in investment and other economic activities.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	use a generalized cash-flow model to describe financial transactions.	K2
CO2	describe how a loan may be repaid by regular instalments of interest and capital.	K3
CO3	analyze straightforward compound interest problems and solve resulting equations of value, including for the implied rate of return.	K4
CO4	apply discounted cash flow techniques to investment project appraisal.	K3
CO5	communicate the difference in capital budgeting decision tools like Net Present Values, Interval Rates of Return and Discounted Payback Periods.	K3

H - HIGH; M - MEDIUM; L - LOW.

Units	Content	Hrs.
Unit I	<p>Annuities payable continuously - Definition and derivation of \overline{a}_n, $(\overline{Ia})_n$, \overline{s}_n, $(\overline{Is})_n$ - Annuities where payments are increasing continuously and payable continuously – definition and derivation of $(\overline{Ia})_n$, $(\overline{Is})_n$. Annuities where payments and interest both are varying continuously -</p> $\int_0^n \rho(t)v(t)dt$ <p>Evaluation of $\int_0^n \rho(t)v(t)dt$. Solving problems associated with the above topics.</p>	3
Unit II	Equated monthly installments - Loan schedules- Principal and interest portion of annuity payments - Calculation of outstanding loan amount at any given time 't'. Solving problems associated with the above topics.	2
Unit III	Calculation of Purchase price to yield a specified rate of return - Dealing with changes arising due to modification of the original terms and conditions of the loans. Solving problems associated with the above topics.	3
Unit IV	Appraisal of Projects – Cash flows, net present value and accumulated profit in an investment project. Solving problems associated with the above topics.	3
Unit V	Internal rate of return, Payback period, Discounted payback period. Solving problems associated with the above topics.	2
	Total Contact Hrs.	13

Pedagogy:

Direct Instruction, Flipped Class, Power Point Presentation.

Assessment Methods:

Seminar, Chalk and talk, Quiz, Assignments, Group Task.

Text Books:

1. CM 1 - Actuarial Mathematics-Combined material pack-The Actuarial Education Company on behalf of the Institute and Faculty of Actuaries, London, 2019.
2. IC - 81- Mathematical Basis of Life Assurance – published by Insurance Institute of India,

1991.

Lecture Hrs./Week or Practical Hrs./Week	1	CRYPTOGRAPHY	Semester:	VI
			Credits:	2

Course Objective

To enable the learners to explore the basic techniques of modern cryptography and to revisit some mathematical results which are foundations for several modern cryptographic algorithms.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	understand the fundamentals of cryptography including data and advanced encryption standards.	K2
CO2	learn to encrypt and decrypt messages using block ciphers.	K2
CO3	acquire knowledge about the uses of RSA crypto system.	K3
CO4	learn about how to maintain the confidentiality, Integrity and availability of a data.	K4
CO5	analyze and apply the concepts of public number generation and public key encryption in real life situations.	K4

Unit	Content	Hrs
Unit-I	Encryption: Encryption Schemes, Symmetric and Asymmetric Cryptosystems, Cryptanalysis, Alphabets and Words, Permutations, Block Ciphers.	3
Unit-II	Encryption: Matrices and Linear Maps, Affine Linear Block Ciphers, Vigenere, Hill and Permutation Ciphers.	3
Unit-III	DES: Feistel Ciphers, DES Algorithm.	3
Unit-IV	Public Number Generation: Trial Division, Fermat Test, Carmichael Numbers, Miller-Rabin Test.	2
Unit-V	Public Key Encryption: Idea, Security, RSA Cryptosystem.	2
Total Contact Hrs.		13

VALUE ADDED COURSE

Programme Code:	B.Sc.	Programme Title:	Mathematics	
Course Code:	21UMS6VA	Title	Batch:	2021 - 2024
Lecture Hrs./Week or Practical Hrs./Week	-	PYTHON TRAINING	Semester:	
			Credits:	2*

Units	Content	Hrs.
Unit I	<p>Basics of python programming Features Of Python – The Future Of Python-Writing And Executing First Python Program –Literal Constants: Numbers, Strings-Variables And Identifiers-Data Types: Assigning Or Initializing Values To Variables, Multiple Assignment, Multiple Statements On a Single Line.</p>	5
Unit II	<p>Decision Control Statements&Functions Basic Loop Structures/Iterative Statements:While loop, for Loop, Nested Loops-The Break Statement–The Continue Statement-The pass Statement-The Else Statement Used With Loops. Need for Functions-Function Declaration, Function Call-Function Parameters, Variable Scope and Lifetime: Local and Global Variables, Using the Global Statement.</p>	8
Unit III	<p>Functions&Modules More on Defining Functions: Required Arguments, Keyword Arguments, Default Arguments, Variable-Length Arguments, Lambda Functions or Anonymous Function. The from an Important Statement-Name of Module, Making Your own Modules-The dir() Function, The Python Module-Modules and Name Spaces-Packages in Python, Standard Library Modules-Globals(), Locals(), and Reload(), Function Redefinition.</p>	7
Unit IV	<p>Python Strings Concatenating,Appending, and Multiplying Strings-Strings or Immutable – String Formatting Operator-Built-in String Methods and Functions-Slice, Operations: Specifying Stride While Slicing Strings-ord() and chr() Functions in and not in operators, Comparing Strings–Iterating String-The String Module.</p>	5

Unit V	File Handling File Path-Types of Files: ASCII Text Files, Binary Files-Opening and Closing Files: The Open() Function, The File Object Attributes, The Close() Method Reading and Writing Files: Write() and Writelines() Methods, Append() Method, The Read() and Readlines() Methods, Opening Files using with Keyword, Splitting Words, Some Other Useful File Methods, File Positions, Renaming and Deleting Files.	5
	Total Contact Hrs.	30
